

WE'RE HIRING

Software Development - (w/m/d) remote

Your Mission:

As a Software Developer at **fr3n.tech**, you will be part of an experienced and dynamic team that strives to bring Web3 into daily usage and push the boundaries of what is possible in Community Engagement. Your enthusiasm for technology and your ability to develop innovative solutions will help realize our vision of a more connected world. **Join us now** and become a digital leader!

Your Benefits:

- **Innovation at the forefront:** Work at the forefront of Web3 technology and shape the future of digital interaction.
- **A young, vibrant team:** Share your enthusiasm and ideas with like-minded people who love technology as much as you do.
- **Personal growth:** With us, there is room to experiment, learn and grow. Your development is just as important to us as that of our products.
- **A dynamic and inspiring** working environment: hybrid working from a modern office in Münster or your home office is possible
- The opportunity to help **build a startup** with your own ideas right from the beginning
- **Attractive payment** including participation in the startup
- **Unfair advantage** in building the startup through: long-term financing and a strong fr3n.tech network of multipliers, pilot customers and strategic partners

Full Stack Developer - Tech StartUp (w/m/d) remote

Who are we?

fr3n.tech is not just a company; we are a movement. At the intersection of **technology, creativity and community**, we're driving the Web3 revolution. Our mission is to enable brands and creators to create real connections through NFTs and engaging community campaigns. If you're a young developer looking for a place to learn, grow and truly make a difference, then you've come to the right place.

Your Tasks:

- As **Lead Developer**, you will play a key role in the development of the software and lead the technical development in our team
- **Experiment with new technologies** and approaches to improve product development and foster a culture of continuous improvement within the team
- **Take responsibility** for the strategic development of the startup by contributing your knowledge, skills and opinions
- **Work closely with product management** and other stakeholders to understand requirements and translate them into technical specifications
- **Continuously improve** and extend the software by constantly improving the architecture and implementing innovative features

Your Qualifications:

- You have basic experience with the following tech stack: Typescript, VueJs, Nuxt3, Tailwind, Prisma / PostgreSQL, Cypress, Vitest, git, yarn, docker/ docker-compose
- Experience with blockchain applications/toolkits and payment service providers would be desirable, but not mandatory (Solidity, Thirdweb, Alchemy, Paper-Wallet, Stripe)
- You have several years of experience in software development and have completed a degree (IT professional, university degree, etc.)
- Ideally experience in building start-ups in the tech / SaaS sector
- Good communication and teamwork skills
- Fluency in English (German is desirable)
- High degree of self-initiative, commitment and flexibility
- Creativity, innovative spirit and a fundamental interest in blockchain and Web3
